

Here we are, the medical college at Innova Sozialwerk e.V.
in Altenburg – Germany

Education in dialogue – this is our concept.

Our main **focus** is on **developing the skills and resources of our students** and on the other side paying attention to their concerns, desires, hope and fears. We offer **technical and educational competences of our teachers**, as well as **modern rooms and innovative teaching material and media**.

Since 1991 we train students for medical and nursing professions. Therefore we have **a lot of experience and capability**. Furthermore, we cooperate with many other institutions of nursing care and more social organizations, e.g. with medical practices. The **cooperation between the hospital 'Altenburger Land GmbH' and the educational institution 'Innova Sozialwerk e.V.'** build together the vocational school 'Krankenpflegeschule gGmbH' and ensure the best education from one source.

Every year, around 100 students begin with their training to finally achieve a graduation in medical or nursing professions. The achievement of the degree further on gives our students the possibility to further education in this field.

	Information	Admission requirements	Contents	Graduation/ Degree	Duration
Nursing care for the elderly	Upper technical vocational school The nurse for the elderly cares and attends for healthy and diseased old people. They develop a nursing plan, make nursing documentations, obey medical prescriptions and evaluate their action.	<ul style="list-style-type: none"> - completed 10-years education (regular school degree) - good individual fitness - confident manner 	The theoretical training takes place in learning fields of 2240 lessons.
